

MSD develops the technical documentation that your developers and engineers would write if...

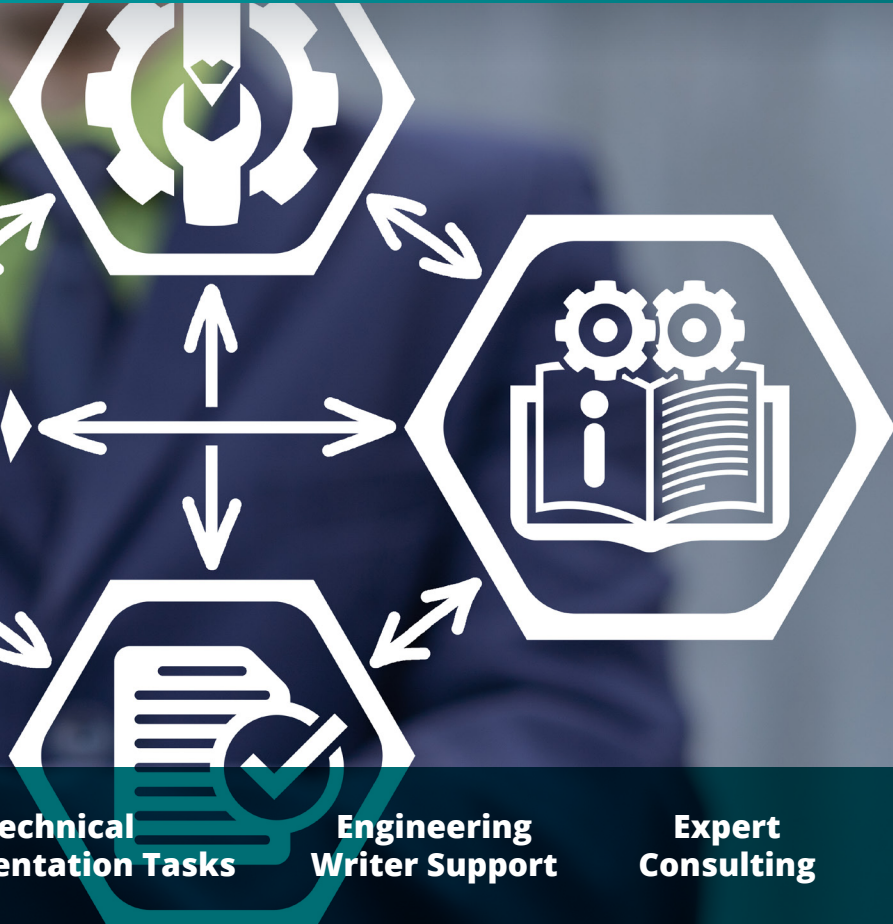

- IF** your engineers had the time between engineering tasks to document.
- IF** you had the budget to pay your engineers to document.
- IF** your engineers were excellent writers and could communicate with actual people.

BUT, IF you don't have the TIME, the BUDGET or the TALENT...

- ✓ **THEN** **MSD converts** your customer's requirements to solid technical documentation products for even the toughest of customers.
- ✓ **THEN** **MSD develops** your technical documentation from "cradle to grave" over and beyond the lifespan of your project.
- ✓ **THEN** **MSD converts** mediocre or non-compliant technical documentation to high-quality documentation that is ready-for-delivery.
- ✓ **THEN** **MSD creates** technical documentation where technical knowledge abounds, but no documentation exists to convey it.
- ✓ **THEN** **MSD brings** an engineering perspective to technical documentation development, whether new, in-progress or approaching delivery.
- ✓ **THEN** **MSD offers** experience, knowledge and expertise to in-progress documentation tasks to help ensure a timely delivery and satisfactory reception.
- ✓ **THEN** **MSD develops** plans for establishing a technical documentation process that will meet your customer's requirements and satisfy your business objectives.
